

Tobias Droy

tobias.droy@gmail.com | 07872 651735 | London, UK | github.com/tobiasdroy

Physics graduate (MPhys 2:1, University of Manchester) with hands-on experience in AI, designing and training neural networks with City Football Group, and in data science and analytics using Python, SQL and Databricks. Track record of building tools that improve how teams work, alongside client-facing roles.

EXPERIENCE

Digital Operations Manager | Vital Flow Health (*Early-stage healthcare startup*) Jul 2025 – Aug 2026

- Engineered an internal tool which automated report generation for clients, significantly improving customer experience while reducing manual work for our team by 60%
- Developed a web-based application to allow users to interpret 94 different metrics from their blood test results, designing the underlying data models, UI design, and API integration from scratch
- Delivered Salesforce administration for the whole organisation, and designed and built 2 company websites
- Acted as the primary on-site liaison between the clinical team and corporate clients, managing appointment logistics and building client relationships

Analyst | The Distilled Group (*Early-stage corporate finance/strategic advisory firm*) Sep 2025 – Mar 2026

- Conducted market and investor research to identify and prioritise 150+ funding partners for clean energy and sustainability projects
- Authored investment teasers and marketing materials, and structured content for the company’s website launch

TECHNICAL PROJECTS & RESEARCH

Masters Project – AI in Football | City Football Group (CFG) Sep 2024 – Jun 2025

- Designed and trained a neural network inspired by U-Net to predict defending players’ positions to within an accuracy of 3 m, using only the positions of attacking players as input
- Trained on confidential Premier League match data using PyTorch & Databricks, with CFG’s data team
- Presented findings to CFG’s data science team at the Etihad Stadium; project awarded 79%
- Managed a two-person collaboration, resolving technical and interpersonal challenges to deliver on time

SQL Analytics Portfolio – Chinook Database | github.com/tobiasdroy/sql-portfolio-1, sql-portfolio-2

- Wrote 11 SQL queries answering business questions using multi-table joins, CTEs and window functions
- Built a retention analysis that ranked top customers per country and labelled each by purchase frequency and time since last order, separating loyal buyers from lapsing ones

Uniquaiser – Personalised EQ profiles | uniquaiser.com

- Built a client-side Web Audio tool that measures personal hearing response and generates a corrective EQ profile

EDUCATION

MPhys Physics (2:1) | University of Manchester Sep 2021 – Jun 2025

- Built Python and C++ programs to analyse experimental physics data, receiving first-class grades across all assessed coding projects
- Simulated physical phenomena including radioactive decay and neutron scattering, requiring statistical modelling, numerical methods, and object-oriented programming

Hampton School Sep 2014 – Jun 2021

- Pre-U:** Maths [D1], Further Maths [D1], Physics [D1], Chemistry [D1], **GCSE:** 9 A*s, 1 A
(D1 is equivalent to a high A* at A-level)

SKILLS

Languages Python (primary), SQL, C++

AI / Data Neural networks (PyTorch), Databricks, data analysis and visualisation, statistical modelling

Tools Salesforce, web development (HTML/CSS), data protection compliance (GDPR)

INTERESTS & ACTIVITIES

Choral singing Performed at the Royal Albert Hall and St Paul’s Cathedral; represented the UK as one of 13 elite singers invited to perform at the Chinese University of Hong Kong’s 60th anniversary celebrations

Music Performed guitar, jazz, and electric bass in both live and recorded rock and jazz bands
